## **DETAILED ACTION**

1. Claims 1-3 are presented for further examination.

### ***Response to Amendment***

2. The applicant's remarks and arguments made with respect to the previous art rejections made under 35 U.S.C. 102, as being anticipated by McCreery et al., U.S. Patent No. 5,787,253, have been found to be persuasive by the Examiner of record, and therefore, any and all rejections using this reference have been removed.

### ***Claim Objections***

3. Claim 1 is objected to because of the following informalities:
  - In line 8, "a condition" should simply read "condition";
  - In line 8, "said data" lacks proper antecedent basis;
  - In line 12, "a condition" should read "condition"; and

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claims 1-3, specifically independent claim 1, line 12 recites the limitation "said identifier". There is insufficient antecedent basis for this limitation in the claim, as the applicant's amendment has removed this feature from the previously filed claim language.

***Allowable Subject Matter***

5. Claims 1-3 would be allowable if the rejection under 35 U.S.C. 112, 2<sup>nd</sup>, were overcome.

As per claims 1-3, specifically independent claim 1, the prior art of record fails to teach a message filtering circuit for use in a distributed control system in which a plurality of nodes are connected to a transmission line, wherein the message filtering circuit comprises a message storing part for storing each message transmitted on the line, wherein each message is comprised of one message sending node, one message receiving node and condition information, a registration part and at least two comparison parts for comparing the condition data, pre-registered in the registration part, with identifiers stored in the message itself, in combination with the other claimed features and or limitations as claimed by the claimed invention.

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
